Better care
– Security
and Support

evondos®

Evondos E300 and Evondos Telecare are CE-certified medical devices

Security and support for medication management

A safe and effective way to administer medicine. Easy to install and use.
A convenient companion to support daily life. This is Evondos® medicine
dispensing service. Supporting your independence.

*"All patients
should have
this device
that I have now."*

Jouko,
home care client

Evondos service provides a guide for correct medical adherence so that medicine will always be taken correctly at the right dosage and at the right time. Well-functioning medical treatment has a great effect on improved overall health and successfully supports independent life. For the person's loved ones, this means less to worry about.

Medical staff can now concentrate on their care procedures, while also having more freedom to plan their schedules. Some medication administration visits can be replaced entirely with an Evondos service.

The Evondos customer service team helps along every step of the deployment process. Their expertise and experience help care organisations to succeed in their client selection and by utilizing the service in the best way possible. The customer support team is at the care staff's disposal at any hour of the day. You are guaranteed to not be alone!

*"Nurses have more
time for the customer
when there's less
need of worrying
about medication
adherence."*

Tuomas Rantala,
System Expert, Helsinki

*"With improved
technology, interaction
with the client is
highlighted. I see this
as a positive step in the
right direction."*

Mari Pilpola, Nurse, Laitila

*"Municipalities should
already be thinking
hard about ways to
shift manual work to
technology."*

Jussi Mattila, Director of Social
and Health Services, Laitila

As the population ages, the need for care increases. Simultaneously, there will be an increasing need for nurses. With the Evondos service, we can do our part to resolve this challenge by supporting customer independence. The care organizer gains an opportunity to strengthen its operations by, for example, minimizing peak periods of work and reducing the number of visits related to dispensing medicine.

Evondos service can connect to other data services if needed. We have executed various system integrations that comprehensively support care organization operations.

Over 15 million medicine sachets have been administered via Evondos service: to the right person, at the right time, and at the right dosage. Evondos end-users are reported to have more than 99% of medication adherence.
